

## ROGUE CLASSIC

The Rogue Classic features a non-ported hardback frame with a Jet Black polished finish similar to the original Bauer M model. The Classic reel is specifically crafted to balance two-handed rods and heavier saltwater rods. The large diameter spool assures quick line pick up and ample capacity to accommodate your line combination of choice from Skagit to PowerSpey.

The Rogue 5 Classic is ideal for switch rods and 5/6 two-handed rods. The Rogue 6 Classic balances superbly with the 12'-14' two-handed rods. The Rogue 7 Classic is designed for the largest Spey lines on the market and delivers the quickest line pick up with a 4.5" diameter spool. The Rogue Classic is simply beautiful.

MODEL	DIAMETER	WEIGHT	LINE	CAPACITY+(BACKING)	REEL	SPOOL
Rogue 5 Classic	4.00 in.	9.5 oz.	Spey	Windcutter 6/7/8+(150yds30#) Skagit 400 grain+(150yds30#)	\$545	\$265
Rogue 6 Classic	4.25 in.	10.3 oz.	Spey	Windcutter 8/9/10+(175yds30#) Skagit 550 grain+(175yds30#)	\$595	\$290
Rogue 7 Classic	4.50 in.	11.0 oz.	Spey	Windcutter 9/10/11+(225yds30#) Skagit 650 grain+(225yds30#)	\$665	\$325

## CFX SPEY

The CFX Spey has a traditional solid back frame with a Jet Black high polish mirror finish. Built on the CFX platform, the sealed carbon fiber drag system delivers silky smooth performance at all settings and in all conditions—no maintenance required. The CFX Spey is traditional in appearance but high tech in performance. A perfect match for the great mid-price switch and two-handed rods available today.

**Innovation** and advanced technology is what auto-racing champion Jon Bauer introduced to fly fishing over a decade ago. The award winning MacKenzie large arbor reel revolutionized fly reel design, forcing every major manufacturer to follow his lead. Our products are put to the test daily by our customers, guides and staff. Our goal is to pursue superior performance and not to accept convention as "good enough". Our passion for fly fishing drives our goal to create innovative, quality products that enhance the fly fishing experience. Join us in the pursuit of excellence.

All Bauer reels are precision machined in the USA, from 100% aerospace bar stock aluminum and stainless steel for maximum strength and corrosion resistance. The spool and drag system rotate on sealed, precision stainless steel ball bearings. The patented, non-corrosive Bauer Zero-Backlash clutch provides a seamless engagement of the disc drag with no hesitation or jerk and permits the user to easily change retrieve direction or service the clutch without tools. The highly developed, floating carbon fiber drag system delivers silky smooth performance at all settings and in all conditions without fluctuation, run after run—no maintenance required. This critical function can not be tested at the fly shop, but only on the water hooked up. So get hooked up with the Bauer Super-Smooth drag experience.

**ROGUE**

The Rogue features the sealed, floating Carbon Fiber disc drag system and V-Arbor design. The distinctive V-Arbor design maintains a larger effective diameter for the portion of the fly line and backing that is actually used when fishing. The balance of the backing is stored in the V bottom of the arbor, always available when needed. The V-Arbor design delivers the performance of ultra large arbor spools without the poor line tracking characteristics of wide spools.

The Rogue has a Jet Black polished finish with optional spool colors. It is also available in striking all Splash frame and spool options. The sealed Carbon Fiber drag, V-Arbor, and lightweight design make it the reel choice for any angler, for any destination.

MODEL	DIAMETER	WEIGHT	LINE WT.	CAPACITY+(BACKING)	REEL	SPOOL
Rogue 1	3.00 in.	3.9 oz.	3-5	WF5+(60yds20#)	\$395	\$195
